

ICT & GDPR – Supplementary guidance during school closure

There are no significant changes to the GDPR regulations or ICT policies. We are reminded that even in these exceptional circumstances we still have a role to play in ensuring all personal data is protected and lawful.

All policies in full can be found on the Castlefields website:

www.castlefields.co.uk/policies

An updated risk assessment is attached for the handling of personal data, along with good practice reminders.

GDPR

Risk assessment of personal data of children for Coronavirus

Should the schools close there will be a need for the DSLs to remain in contact with vulnerable children. This may mean Personal data going home in electronic or paper files.

There will be a risk as Children's personal data and any information recorded during the duration of closure will be stored in DSLs home, and normally this would not be recommended.

Risks

- 1) Children's names, address phone numbers will be stored on paper copies at home
- 2) All calls made to the families will be recorded on either paper or electronically and may not be able to be taken by to the school during closure.
- 3) Other family members may be at home due to school closures, business closures or possible infection.

Reasons for data to be stored and recorded

These children are considered to be at risk or vulnerable whilst not at school for many reasons e.g. Education Health Care Plans, Looked After Children or families who are in receipt of Free School Meals or those on Early Help Plans etc. The Local Authority, Trust and individual schools have a duty of care during this pandemic to protect and safeguard these children.

The DSLs will be required to contact these families to ensure all is ok e.g. to check on the mental health and wellbeing of the family and that they have food etc.

In light of this we feel there is a real need for data to be kept at home as long as the following is adhered to:

- 1) Where possible all this is stored and recorded using the cloud.
- 2) Where paper copies have to go home, that they are signed out from the school by the designated lead.
- 3) The minimum of data is taken home from school and once at home is stored safely at home e.g. in a filing cabinet.
- 4) Any data recorded about each child is kept to a minimum e.g. – Called Parent of SW today they have enough food for a week.
- 5) Where possible this data is taken to school as soon as is possible and signed back in.
- 6) That this information is not recorded on any personal devices e.g. Word on a personal laptop.

Data Breach

There are no changes here – If staff believe a data breach has occurred they must contact Jackie Hampson head@castlefields.org.uk as soon as possible (at least within 12 hours of the event occurring).

However, staff are reminded that whilst working from home sensible precautions can be applied to reduce the risk of a data breach.

- Staff are reminded that any of the school's ICT equipment is for their use only in line with their professional responsibilities/duties.
- Where possible all records should be recorded electronically.
- If paper copies of files (this should be avoided apart from instructions from the DSL) are used these must be stored securely and contain minimum information.
- All staff should ensure that when not using ICT facilities – the screen should be locked.
- If any sensitive pupil/staff data is shared between professionals – please check email addresses, where possible password protect a document and share the password via phone.

You can also encrypt messages by entering:

Encrypt: *Normal message title here*

Never put the pupils full name in the subject line – please use initials only.

Processing of Personal data

On the 19th March 2020 the European Data Protection Board adopted the following statement:

https://edpb.europa.eu/news/news/2020/statement-edpb-chair-processing-personal-data-context-covid-19-outbreak_en

E-Safety & ICT – Policy can be found on the school website

All staff and pupils are signed up to an authorised user policy (AUP) – the conditions of these still stand.

All use of school equipment and pupil accounts are monitored for security, diagnostic and account/audit reasons.

Any loaned equipment has been signed for.

To support distance learning the rotation of passwords for both staff and students has been suspended. Therefore, staff will not be prompted to change passwords, but if they feel passwords have been compromised, they must contact the ICT team and inform Jackie Hampson immediately.

The school is setting work for pupils through ClassDojo. This should be the only electronic tool used for the setting of work.

When setting work staff are to follow their daily class timetable as closely as possible. As time moves on more open ended projects for the foundation subjects can be set but Maths, English need to be set daily and weekly spellings and SPAG.

The messaging service teachers2parents or ClassDojo should be used to predominately communicate with pupils. Staff are reminded to adhere to the usual protocols with regards to e-mail communications as per the ICT policy.

Please take care when responding to emails to avoid reply all.

Where staff are required to make phone calls to parents they should ensure that they withhold their numbers:

Landline: 141 should be entered before entering the phone number

Mobiles: This changes according to phone, but a step by step guide can be found below:

<p>Hide your number on an Android device</p> <ol style="list-style-type: none">1. Open the Phone app.2. Open the Menu.3. Select Settings.4. Click on Call settings.5. Click on Additional settings.6. Click on Caller ID.7. Choose "Hide number" and your number will be hidden.8. Choose "Show number" or "Network default" to resume showing your number. 	<p>There are two ways to hide your number on your iPhone when you make calls. The first way is to go into the Settings app and tap Phone. Next, tap Show My Caller ID and turn off the switch next to Show My Caller ID. You'll know the switch is off when it's gray and positioned to the left. 21 Oct 2019</p>	
---	--	---

A member of staff has been given responsibility to support parents/staff with E-safety concerns regarding ClassDojo – d.barlow@castlefields.org.uk

Video Conferencing – There is no expectation that staff film themselves or partake in video conferencing calls with pupils. Teachers are asked not to put themselves in this situation and to protect professional boundaries. In the very rare occasion that this is needed staff should seek authorisation from Jackie Hampson

The main secure (video conferencing) tool that the school approves for the communication between staff and groups of staff is Microsoft Teams.

Other communication tools like Zoom are not permitted to discuss school related matters. However, groups of staff can communicate with each other on Zoom or other social media apps, but only for the purpose of touching base and general uncontentious discussion. In these instances, personal accounts/email addresses should be used, and no sensitive or contentious school business discussed, including no discussion about pupils.

All of our main school business and pupil/school related discussions must be undertaken through Microsoft Teams. Pre-arranged groups have been established. If staff wish other groups to be set up they must contact Andy Thomas or Matt Flavell and they will help you get started. It's very easy to use and secure.

These are the main issues with Zoom:

1. Each Zoom call has a randomly generated ID number between 9-11 digits long – if someone guessed or used brute force they could obtain code and join meeting
2. The camera function in Zoom has vulnerability that could allow someone to easily hack in and project inappropriate images during a meeting – called Zoom bombing and currently very popular with people with time on their hands
3. Default settings for Zoom do not encourage passwords to be set for meetings
4. Device data sent from Zoom to Facebook – this supposedly has now stopped as this was leaked out to public
5. It does not use end to end encryption even though its website says it does
6. There is an attendee tracking feature where host can track whether participant has Zoom live on their screen or just dormant in the background

Some mitigation for its use is:

- Remember to set a password on the meeting for both the web meeting and for users who phone in (there are settings for this) – you could ask organisers to do this
- Don't broadcast or screengrab the meeting like they did in the cabinet meeting as it exposes the meeting ID and usernames of the attendees (meeting passwords can be bruteforced)
- Be clear who you are inviting, who knows who the iPhone user was, and hopefully they do know who that was – if you are not setting up but participating you might just want to confirm who is in the meeting
- Don't share personal identifiable information or sensitive information, Zoom may clear a few things up in the future around compliance and controls hopefully.

Remember any video conferencing concerning school related business should be done through Microsoft Teams.

Communication – To support the challenges of distance learning the following has been agreed:

Staff will be contactable between the hours of 8.30am and 3.30pm via email. However, staff may not be able to respond straightaway as they will be planning, setting work or delivering feedback where appropriate. As a result, any response may not be received that working day, but staff will endeavour to contact you as soon as possible.

Staff will communicate with pupils and/or parents through the messaging service within ClassDojo or via school email.

The expectation for communication regarding distance learning with parents can be found in Appendix A.

This supports a system of checks to ensure pupils can access the work and checks on pupil welfare.

Vulnerable pupils have been identified and have regular contact via a key worker. The outcomes of these are monitored by the DSL.

The established systems ensure that the schools child protection policy continues to operate remotely.

All school staff should be familiar with the schools safeguarding policy.

Jackie Hampson

Headteacher Castlefields Primary School

April 2020

Monitoring Pupil Work and Engagement

Teachers

- Teachers should be setting work as per timetable. However, be mindful of the work set.
- Set one piece of Maths work, one piece of English work that needs to be screen shot and added to the ClassDojo site

Monitoring Pupil Engagement

Teachers check pupils have logged on and have looked at work

On the task that you have set – you can comment on the pupil's work.

What to do if pupil has not looked at the work?

Go to messages within the class and write a message to parents.

Ask if they are having issues with the work?

Next time you set work for this class repeat above steps. If they fail to check/submit work despite above reminder – then email or phone home.

Ask parents if pupils are finding it difficult to log or having difficulty accessing work. Record contact with home on spreadsheet your initials and date

Bear in mind SEND pupils and LAC pupils ask LS for advice or JH.

Before contacting home via email or phone check with Jackie Hampson whether she has been in touch with them regarding any family issues.

Following your contact with home – if pupil is still not working

Then refer to your Headteacher

Headteacher will also be monitoring each class site during term time.
